Re: Commission's Rules To Ensure Compatibility with Enhanced 911 Emergency Calling Systems, CC Docket 94-102, TTY Compatibility with Digital Wireless Systems

Dear Ms. Salas:

Lucent Technologies Inc. ("Lucent") is an active participant in the TTY Forum, which, as you know, is developing standards to ensure compatibility between digital wireless systems and TTY devices. In support of these efforts, Lucent respectfully submits the following information regarding our TTY efforts.

Per our previous submission, First Office Application ("FOA") testing of our TTY solution for CDMA and TDMA was completed in October of 2001. Since that time, the aforementioned TTY solution for CDMA and TDMA was made generally available to carriers on December 20, 2001. In addition, Lucent has been participating in the ATIS TTSI field-testing of the CDMA and TDMA based TTY solution by offering the Lucent LIVE Net Facility in Lisle, IL as a testing site.

As we continue to work with others in the industry on this issue, Lucent remains strongly committed to developing TTY solutions for our products. If you have any questions, please feel free to contact me at (703) 326-6350.

Sincerely,

Gena L. Ashe
Lucent Technologies
Corporate Counsel
